**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

2. Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Hansen et al (EP 1032228 A2).

Consider claims 1 and 8, Hansen et al teach an on-line currency exchange system and method for mobile phones (see abstract) comprising: means implemented in said mobile phone for setting a currency exchange rate in said mobile phone, said means enabling entry of exchange rate currencies such that a mobile phone call to be made according to first currency units may be converted in terms of second currency units (see paragraphs 0025-0026); means for requesting receipt of a current said exchange rate from a mobile phone service provider according to the entered values (see paragraphs 0026-0027); means for providing a current currency exchange rate and communicating said rate to said mobile phone in response to said request, wherein, a dialed number initiated from said mobile phone may be converted from said first units into said second currency units in said mobile phone (see paragraphs 0029-0030).

Consider claims 2 and 9, Hansen et al teach the system and method further comprising means for establishing an update period setting forth validity of said stored currency exchange rate, said means associating a time stamp with a stored currency exchange rate (paragraphs 0004, 0006). It should be noted that currencies exchange rate changes on a daily basis. Thus, update period must be established on a daily basis in order to provide accurate conversion rate.

Consider claims 3 and 10, Hansen et al inherently teach wherein said time stamp is communicated with said requested currency exchange rate and stored in said mobile phone. It should be noted that all telephony communications includes time stamp for proper record keeping as well as billing purposes.

Consider claims 4 and 11, Hansen et al teach the system and method further comprising means for updating a requested currency exchange rate for said mobile phone if after an update period, said means comparing said timestamp with a current time and sending new exchange rate to said mobile phone if after said update period (paragraphs 0006, 0008).

Consider claims 5 and 12, Hansen et al teach exchange system further comprising means for modifying said update period (paragraph 0008; it should be noted that update period may be inherently set based on preference of the network operator).

Consider claim 6, Hansen et al wherein said mobile phone service provider stores selections of updated currency exchange rates (paragraph 0030).

Consider claim 7, Hansen et al teach the on-line currency exchange system further including keypad means enabling entry of a calling number into said mobile phone (see Fig. 1 and 2).
